Professor William Rawlinson
w.rawlinson@unsw.ed.au

Associate Professor Barry Slobedman
barry.slobedman@sydney.edu.au

Conference Secretariat

Mandie Quince
Mandie.Quince@qimr.edu.au

This conference will have a major focus on the translation of basic research to the clinic. A number of sessions focusing on clinical management and novel treatment strategies for CMV-associated diseases are planned. In addition, information sessions for the public on these diseases will also be held during the CMV conference. We look forward to strong interaction between basic scientists and clinical experts.
